

EXPLANATION

MATERIALS

- Af** Artificial Fill
- AIs** Active Landslide
- Dis** Dormant Landslide
- SIs** Static (ancient) Landslide

Material Units Used in Stability Analyses
(see text for complete description of units):

- ① Surficial Soil
- ② White Clay
- ③ Weathered and Fractured Rock
- ④ Rock

SYMBOLS

- ▼ Ground-Water Level (assumed for stability analyses)
- - - Contact Between Material Units
- Active Portion of Cragmont Landslide. Symbols denote relative motion:
 - ⊕ away from viewer
 - ⊙ toward viewer
- Discontinuous Zone of White Clay
